Fagus GreCon

A SINGLE SPARK IS ENOUGH

Without reliable prevention systems, your production may be exposed to:

- Fire and explosion hazards
- Costly production downtime
- Equipment damage
- Risks to personnel
- Non-compliance with regulatory and insurance requirements

GreCon detects and eliminates ignition risks before incidents occur.

GRECON SOLUTIONS FOR INDUSTRIAL FIRE PROTECTION

- **Automatic spark detection and extinguishing systems**

  Prevention of fires and explosions in industrial production facilities.

KEY BENEFITS

- **Early Risk Detection**

  Instant detection and extinguishing of sparks and potential ignition sources.

- **Reduced Production Risk**

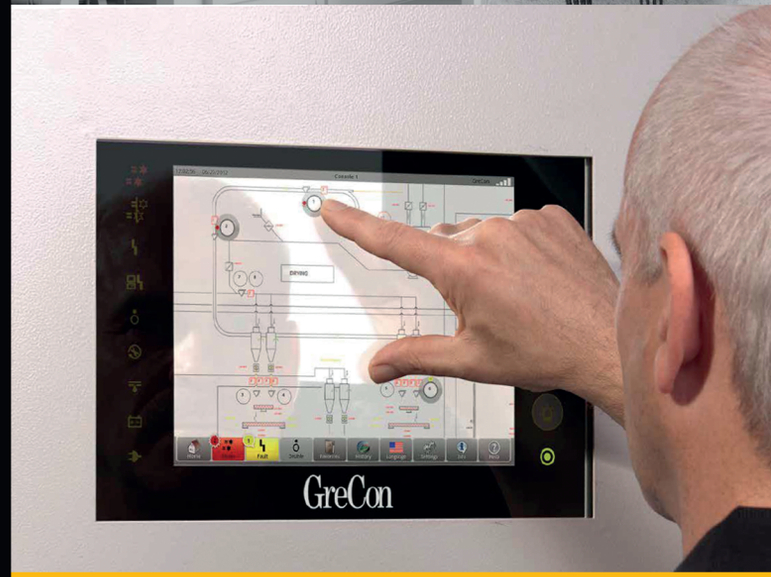
  Minimizing accidents, material damage and unplanned downtime.

- **Enhanced Operational Safety**

  Protection of equipment, personnel and production infrastructure.

- **Regulatory Compliance**

  Meeting fire safety, insurance and regulatory requirements.



Used Across Industries Including:

- Metal Processing
- Woodworking
- Recycling
- Food & Beverage
- Pharmaceutical
- Chemical

WHY UNISTER?

As the official GreCon partner in Bulgaria, UNISTER provides:

- Technical site assessment and risk analysis
- Solutions tailored to your production process
- System engineering, integration and commissioning
- Seamless integration into existing production lines
- Fast service response and spare parts support
- Long-term maintenance

PROTECT YOUR PRODUCTION BEFORE A FIRE STARTS

Contact the UNISTER experts for technical consultation and an integrated fire prevention solution tailored to your process.
